TAKE SHAPE

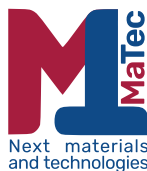

WELCOME TO PLAST 2026

Following the success of the 2023 edition, **PLAST** returns to **FIERA MILANO Rho** (Milan, Italy) from **June 9 to 12, 2026**, reaffirming its role as one of the leading events for the entire plastics and rubber supply chain. With over 50,000 sqm of net exhibition space and 38,000 visitors in the previous edition, PLAST offers a premier platform for innovation, professional growth, and business networking. Three specialized **satellite shows** will once again spotlight key areas of excellence: **3D PLAST**, **PLAST MAT** and **RUBBER**.

PLAST 2026 will take place alongside **XYLEXPO**, the biennial international exhibition for woodworking technology and the furniture industry, and **COMPOSITES FUTURE**, a new trade fair and conference for composites sector.

Together, these events will be co-located under **MaTec 2026** project (Materials and Technologies), a synergic format bringing together suppliers, technologies, and materials across different industries: plastics and rubber, furniture and woodworking, construction, marine, aerospace, automotive, and more.

Operators will be allowed to visit all three shows with the same ticket opening the door to cross-industry innovation, international visibility, and new business opportunities.
